Replication Report on Enos (2014)

David Kane

2019-02-15

Abstract

I replicate "Causal effect of intergroup contact on exclusionary attitudes" (R. D. Enos (2014)) using code/data deposited in the Harvard Dataverse (R. Enos (2017)). There are two figures and three tables in the original article.

Table 2

```
## Too many permutations to use exact method.
## Defaulting to approximate method.
## Increase maxiter to at least 4537567650 to perform exact estimation.
## Too many permutations to use exact method.
## Defaulting to approximate method.
## Increase maxiter to at least 9075135300 to perform exact estimation.
## Too many permutations to use exact method.
## Defaulting to approximate method.
## Increase maxiter to at least 9075135300 to perform exact estimation.
```

	var.names	out.mat.a	out.mat.c	out.mat.x
		(1)	(2)	(3)
		all respondents	waits on platform	all respondents
	question	ATE (p)	CATE (p)	T1 levels (sd)
	Number of immigrants be increased?	0.09 (0.008)	0.083 (0.012)	0.489 (0.272)
	Children of undocumented be allowed to stay?	0.073 (0.016)	0.098 (0.016)	0.441 (0.362)
	English as official language?	0.03 (0.27)	0.043 (0.152)	0.619 (0.364)
